## Summary

### About this Release

A confidentialised data file consisting of variables from the Employment Arrangements, Retirement and Superannuation 2007 master file at the unit record level. Deletion of some variables and aggregation of categories in other variables ensures that confidentiality provisions are not compromised. Subject to the data classifications used, it is possible to manipulate the data, produce tabulations and undertake statistical analyses to individual specifications.

The expanded CURF is only available via the Remote Access Data Laboratory (RADL).
